## Barb Wire

2 Point and 4 Point. We have a quantity bought here for the raise, let us quote you on your requirements.

## SPIECE & SON

PHONE 15 MIRROR BOX 15

## Extra Good Beef

A prime four-year-old steer was shipped from Mirror last week to Calgary, by T. Canfield, through the Buffalo Lake Co-operative Livestock Shipping Association. The animal weighed 1040 pounds and brought the owner \$130.85, or 16c a pound.

This week the association has shipped 11 cars of stock, nine cattle and two hogs, from Ties, Haynes, Olive, Bashaw and Mirror. All the shipments were billed to Calgary, with the exception of one car of cattle

which went to New Westminster, B.C.

## MUST REGISTER BIRTHS

The deputy registrar general of the bureau of vital statistics, Edmonton, has advised the local registrar, Mrs. G. K. Tilley, that the department intends to very strictly enforce the "Vital Statistics Act" and that action will be taken where parents neglect to register the birth of a child. It has been brought to the attention of the department that parents have been getting very negligent in this matter.

## New Stock of Harness Supplies Arriving

Halters, Hamestraps, Breast Straps, Snaps, Etc.

**Special in Men's Work Shirts**

Grey or Blue Pin-Check

**\$1.50**

**Men's Suit**

Size 44

**\$20.00**

Come and see our Special Value Navy Blue Serge Suit in any size at.....

This is a winner and will stand inspection.

**\$40.00**

**Papruker's Store - Mirror**

## M. D. DISCUSS ROADS-BRIDGES

The council of the Municipal District of Lamerton, No. 308, met at municipal office in Alton on Saturday, May 10th, at 2 p.m. All the members of the council were present with D. M. Jewell in the chair.

The minutes of the previous meeting held April 12th, were read and approved of on motion by Mr. Tallman.

The matter of the petition from ratepayers of division 4, re-opening of road allowance lying between 11 and 12 1/2-24-4, was reported on by Councillor Cassell. He stated that he had looked the matter over carefully and in his opinion it was up to those interested to take the action necessary to open up the road allowance, and after discussion the secretary was instructed to notify those parties that if it is desired the road to be opened they would have to apply for a lease for the land necessary for the opening of the road, and in the case of any others objecting to the opening of the road, the matter would be taken before the council.

Re tax sale of lands for arrears of taxes from 1922. The secretary was instructed to send final notice, by registered letter, to the parties interested and unless immediate payment was made at once, on all arrears of taxes, proceedings would be commenced forthwith.

In regard to disputed item of pay sheet for roadwork, re R. Longson, of Ties, Mr. Cassell agreed to take the matter up with the former councillor, Leo Forcht, and report at next meeting of council.

A letter from Lacombe hospital re case of Hubert Gillespie, of Ties, was left over until next meeting.

A deputation from division 2 waited on the council in regard to the north road in that division and asked that immediate action be taken towards opening this road in shape after some discussion Councillor Tallman stated that just as soon as help could be secured and after the crops are in, the matter would be attended to.

Re the assessment of the remaining subdivided land N.E. 30-29-24-4. This land is subdivided under two plans and the titles for same being very numerous, the secretary was instructed to take the matter up with the department, and see what could be done towards having the same placed on the tax roll.

Re account of Red Deer hospital and F. J. Randall. The secretary was instructed to advise the hospital authorities that as we are under agreement with the Camrose Hospital authorities to take care of all indigent cases with this municipality, we must refuse to acknowledge the account referred to.

George Nielsen waited on the council in regard to fencing of trail 27-29-24-4 (Hudson's Bay land) and stating that the trail was being used continually on account of the poor condition of the recognized road. Mr. Tallman agreed to have the road fixed, and the council advised Mr. Nielsen to advertise the fact that the trail was now closed and to put up a sign to that effect.

On motion of Mr. Olsen the council agreed to recommend to the department of public health the application of Mrs. Harry Berg for an allowance, under the Mothers' Allowance Act.

On motion of Mr. McDonald, the secretary was appointed inspector under the provisions of the Mothers' Allowance Act. The secretary presented a letter from Walter King re notice of closing of trail between sections 15-22-41-24-4, and after discussion the matter was left over until next meeting.

Re W. E. Ties and cemetery land. Mr. Cassell and Mr. McDonald were appointed a committee to look into the situation and if possible to arrange

(Continued on page eight)

## TRIBUTE PAID ON "MOTHERS' DAY"

Last Sunday afternoon at three o'clock, one hundred and eighty-six people gathered in the Grand theatre at Mirror, to pay tribute to "Motherhood." Among the audience were representative groups from the different rural points under the charge of the pastor, A. E. Night, of Mirror Union Church, Ripley, Hocking and Lakehead, in numbers twenty, five and eleven respectively, and with one hundred and fifty-one from Mirror.

The order of service was that prepared by the Religious Education Committee of the church. The older mothers and grandmothers were seated upon the platform, Mrs. A. J. Ray, Mrs. J. W. Spies, Mrs. J. H. Hinzman, Mrs. C. Estell, and Mrs. H. C. Brewster, together with Mrs. Robert C. W. H. E. Olding and H. W. Papruker, speakers of the afternoon, with Mr. Night in the chair. Mrs. L. G. Fisher presided at the piano.

An impressive part of the program was the expression of gratitude, symbolized in the presentation of ferns (immortality) to the mothers and the grandmothers by six small boys of Norman Bay's Sunday School class. Mrs. H. C. Brewster responded in words of deep appreciation.

Cards of Recognition to primary girls and boys, diplomas and certificates to juniors and intermediates were presented to those successful in their Bible Courses. Recitations by Eddie Olding, Bernice Hall and Norman Ray were well received by the audience.

Mrs. Olding was the first speaker, on the subject, "Our responsibility to Motherhood." She spoke on "What we owe our Mother, and Mr. Papruker, "Our Mother's Teachings." All spoke accentuating the note of true motherhood and bringing to mind the divine relationship of mother to all mankind, for the present was expressive of the success of the gathering and hopes are entertained for another such rally in the name of Motherhood.

## COUNCIL DISPOSE OF VILLAGE LOTS

The regular monthly meeting of the village council was held in the secretary's office on Monday, May 12th, 1924, at the hour of eight o'clock in the evening. G. Thomas and F. Smathers present.

Minutes of the meeting of April 7th, were read, approved and adopted by Messrs. Smathers and Thomas.

The following accounts were presented:

Hodgson, P. P., 5 nights at hall	\$ 5.00
Collecting 2 dog taxes	.50
Atty-gen., re Mrs. Hutchinson, to Mar. 31st.	52.50

Thomas - Smathers: That secretary be instructed to have a crowning removed on North side of Lake street across from village hall.

Smathers - Thomas: That application of N. J. Devereaux for restaurant license be approved of.

Thomas - Smathers: That hitching rack at present near the bake shop be moved straight north and be placed about 40 feet north of Lake street on the west side of the street.

Thomas - Smathers: That secretary be instructed to write Tom Wing and W. Beamish and advise them that numerous complaints are being made as to their poultry running at large and that unless same is stopped, proceedings will have to be taken against them for violating a village by-law. Meeting adjourned.

## Wheat Showing

The farmers in the Mirror district have not completed their wheat seeding for this year and on some of the farms the grain is about four inches and looking fine.

About 250 Jute Sacks for sale, 2 for 15c. Jaynes Bakery, Mirror.

## Mirror Maple Leafs

The Mirror Maple Leaf baseball club re-organized for the coming season at a meeting held on Friday, May 9th. The following officers were elected:

Albert Ray, manager; Ralph Lacey, captain; Harold Olding, sec.-treas. The first game of the season will be played with Bashaw on the Mirror school grounds on Friday evening, May 16th, at six o'clock.

For the purpose of raising funds, the Maple Leafs will hold a whist drive in the library building on Monday evening, May 19th. Everybody is asked to attend and help the boys.

Last Saturday the Alberta Liquor Act went into force and vendors' stores were opened in Calgary and Edmonton. Other stores throughout the province will be opened shortly. It will be a month before the licenses are granted to the beer salarooms.

The Women's Guild of St. Monica's Church will meet at the home of Mrs. A. W. King on Thursday afternoon, May 15th, at two o'clock. An invitation is extended to any lady wishing to join the Guild, to attend the meeting.

If you want to get expert information regarding any line of

**A. COMMON Mirror, Alberta**

Canadian National Railways Time Inspector

## CHARGES MADE AGAINST C.N.R. AT THE COAST

Ottawa—Senator J. D. Taylor, of New Westminster, B.C., charged in the Senate that there was negligence in the several departments of the Canadian Government Merchant Marine and the C.N.R. in British Columbia. He spoke on an order for the production of correspondence with the marine department respecting an inquiry into an alleged casualty on the C. G. M. M. steamer Canadian Farmer, and said he had been for 15 months endeavoring to secure the attention of higher officials, including the president of the railway company, to obtain an inquiry into conditions in the railway and steamship service in British Columbia, and the results of the inquiry had been negative by the direct order of the president.

Senator W. H. Bennett gave notice that he would move for an inquiry into Canadian National Railway expenditure by a special committee of the Senate.

Senator Taylor's charges had reference to the alleged use of the Canadian Government Merchant Marine for run ryaling, defrauding the insurance companies by false statements of remain on steamers, and to illegal commissions in the marketing department of the railway company in Vancouver, and with these were charges of extortion of gully officials and dismissal of those who sought to purge the service of wrongdoing.

## Portuguese Aviators Caught In Cyclone

Two Received Slight Injuries and Biplane Was Damaged  
Allahabad, British India.—The Portuguese aviators, Paulo Pires and Sacramento Bello, attempting a flight from Lisbon to Marrakech, Cape Verde, were caught in a cyclone and were forced to crash-land at Pauri, in Jodhpur. Lisbon.—A message received here confirms the report that the Portuguese aviators flying to the Cape Verde suffered an accident at Jodhpur. The message adds that the aviators were slightly injured and their biplane damaged.

The mishap of the fliers was due to their being caught in a storm of cyclonic intensity. A later message said that Lieutenant Pires was slightly injured and that the biplane suffered serious damage, but that Lieutenant Bello was unhurt.

## Crow's Nest Pass Agreement

Stated That No Action Will Be Taken To Continue Extension of Ruling

Winnipeg.—The following special despatch from Ottawa relative to the Crow's Nest Pass tariff agreement is carried by a local newspaper. "The government will allow the remainder of the Crow's Nest Pass freight rate agreement to come into effect this summer, according to reliable sources of information. While it is not expected that the government will commit itself definitely to this policy until the time arrives, many assurances have been given informally to private business representing western constituencies that no action will be taken to continue the present suspension of the agreement."

Invitations to Naval Reception  
Vancouver.—Eminent invitations, embossed with the official seals of Vancouver and Victoria, are being dispatched from the mayor's office to the heads of cities and municipalities of the four western provinces asking them to be represented at the reception to the British special service squadron at Victoria, June 21, and Vancouver, June 22, 1923. These invitations will go to points in the Canadian west.

B.C. Provincial Election  
Victoria, B.C.—It is unofficially stated here that the provincial general elections will be held on Saturday, June 21. A pamphlet on the question of whether beer shall be sold by the glass, in licensed premises, will be taken, it is believed, on the same day.

Wireless Operators Strike  
Pitt.—Two Pitt wireless company's operators, with but few exceptions, were on strike in a protest against the dismissal of some of their members and to obtain more pay. It is believed to be the first wireless operators' strike on record.

## PREPARING FOR A FIGHT ON THE TARIFF ISSUES

Ottawa.—"There has been no selling out," declared Hon. W. R. Motherwell, minister of agriculture, in the House during the continued debate on the budget. Mr. Motherwell was referring to relations between Liberals and Progressives. He added that the platform of the two parties were identical.

Subsequent debate brought a further assurance from Premier King that Right Hon. W. R. Motherwell's statement was in sympathy with the budget proposals. "After making out statements on Mr. Fielding's attitude," said the Premier, "I have had a conversation with Mr. Fielding and he requested me to repeat it again."

Col. Arthur (Conservative, Party Solid), referred to immigration as one of the gravest problems Canada had to face. During the last fiscal year, 133,000 had entered Canada while, in the same period, 139,000 left Canada. Calculating that the average laboring man earned \$1,000 a year, Canada lost \$138,000,000.

Hon. W. R. Motherwell said the budget was a "real Liberal one." The parties were lining up for a fight on the tariff issues, and the budget was made in that it made a distinct cleavage between high and low tariff groups.

Mr. Motherwell said the Conservatives had not yet recovered from the surprise they received in the speech from the throne. The announcement from the implement minister that they could get along very nicely under the new tariff was a final blow to the opposition, which was still frantically trying to represent industry as ruined by the tariff.

Hon. Dr. R. J. Manion had cried out that industry was being sacrificed to politics, that the Liberals had sold out to the farmers. "There has been no selling out," said the minister of agriculture. "Our platform is identical with the farmers. If we carry out ours, we automatically ruin the farmers." Mr. Manion pointed out that some of the prairie provinces produced more butter and eggs per capita than Ontario.

Revenue From Stamp Tax  
Ottawa.—An increase in the amount stamp tax is indicated in the answer to a question in the Commons, when it was stated that from November 1, 1922, to March 31, 1923, the amount netted in both post office and customs departments from this source was \$2,531,852. In the same period ending March 31, 1924, the amount was \$3,014,189.

Spain Meliorizes Plans  
London.—A British agency despatch from Seville, Spain, says that the war minister has ordered all military airplanes and personnel of the Spanish flying corps to be ready for immediate departure for Morocco.

The information is attributed to the newspaper Voz, which intimates that the order is a consequence of urgent despatches from Morocco reaching Seville last night.

Japanese Exhibition Bill  
Washington.—At the instance of President Coolidge, the conference from both houses of the immigration bill have reconsidered their decision to delete the Japanese exclusion provision and will report a provision to make the exclusion effective March 1, 1925, with the understanding that meantime a formal abrogation of the gentleman's agreement will be negotiated.

## Should Keep In Closer Contact With New Settlers

Ottawa.—That the conduct of Canadian to the United States should be eliminated "by a close and sympathetic attention to immigrants before both their hearts and pockets break" was the salient observation of the Hon. J. Lindsay, British army officer and big game hunter, who was a visitor here. "One of the reasons for the falling down of the fur trade has been in not keeping in close enough contact with the settler after he has arrived in the country, and in not fostering him safely through the initial period," he added.

## No Rupture Between England and Russia

Committees Considering Question of Debts Between Two Countries

London.—Reports that have been widely circulated during the last few days that the negotiations of the Anglo-Russian conference had completely broken down are denied by both parties to the proceedings. Four committees are continuing the work of considering the questions of debts between the two countries, commercial claims, counter claims, territorial waters and a general commercial treaty. These committees have been working steadily for three weeks preparing their reports for consideration by the plenary session of the conference.

It is currently rumored that the counter claims put forward by Russia, although exceedingly high, is not likely to outweigh the British claims. Immediate cash compensation to individuals is, however, regarded as one of the questions. The committees are further studying the best methods of raising funds for the gradual liquidation of both private and national debts.

## Soviets Warn Germany

Demagogy for Police Raid on Headquarters in Berlin

Moscow.—In the absence of any satisfactory explanation from the German Government concerning the recent police raid on the Soviet trade headquarters in Berlin, the Russian Government is taking an increasingly serious view of the affair.

All the Soviet newspapers describing the raid as a "real Liberal one." The parties were lining up for a fight on the tariff issues, and the budget was made in that it made a distinct cleavage between high and low tariff groups.

Mr. Motherwell said the Conservatives had not yet recovered from the surprise they received in the speech from the throne. The announcement from the implement minister that they could get along very nicely under the new tariff was a final blow to the opposition, which was still frantically trying to represent industry as ruined by the tariff.

## Britain May Admit Pedigree Cattle

Minister of Agriculture Preparing Bill For Imperial Conference

London.—Noel Duxton, minister of agriculture, states that he is preparing a bill to give effect to the imperial conference recommendations with regard to the admission to Great Britain of pedigree stock from other parts of the Empire. In consequence of the preparation of the bill, the minister has declined to receive a delegation that was to have visited upon him to urge the free importation of pedigree cattle from Canada.

## Soviets Would Like Old Russian Embassy

Seeking to Get Possession of Building in London

London.—The Soviet delegation in London, or the British Government on the behalf, is seeking to get possession of the building formerly occupied by the Russian Imperial Embassy, according to reports. The building known as the Russian House, now is occupied by Russian charities under the auspices of the Russian council, which refuses to recognize the Soviet Government.

Cyclone Wrecks Saxon Village  
Berlin.—A windstorm of cyclonic proportions wrecked Kidenbreen, a village of 50 houses near Nordhausen, Saxony, says a despatch. The town is said to have been leveled as though by artillery fire. No fatalities are reported.

Severe Quake Reported  
Manila.—A severe earthquake, the centre of which is believed to have been about 10 miles off the Pacific Coast of the Philippines, was recorded here at 12:10 p.m. May 7.

## Strong Arm Of Labor Party

Philip Snowden, Chancellor of the Exchequer, whose Budget Speech has drawn cross fires of the Opposition.

## Beatty Elected Chairman

C.P.R. President to Occupy Position Held by Late Lord Shagnessy

Montreal.—At a meeting of the Canadian Pacific board of directors held after the annual meeting of shareholders, E. W. Beatty was elected chairman and president. The two positions were originally held by Lord Shagnessy, the company's first president. When Lord Shagnessy died, the positions were split, with the directors to hold the positions and either one or two men. Lord Shagnessy was re-elected president, and retiring directors were re-elected.

## HOLD BIG RALLY TO BOOST THE H. B. RAILWAY

Saskatoon.—Business men and farmers from all parts of Northern and Central Saskatchewan have joined hands with practically every organization in Saskatchewan in urging immediate completion of the Hudson Bay Railway.

At a big rally staged upon Beatty's suggestion, a resolution was passed by the On-to-the-Bay Association was launched, after ex-Mayor Chas. P. Gray's address, president of the association; J. S. Menzies, Winnipeg, secretary; Col. R. H. Webb, Winnipeg, and other prominent men had spoken.

A resolution was unanimously passed urging upon the Dominion Government the immediate completion of the railway, and asking that the necessary legislation be passed at this session of parliament.

The resolution was proposed by D. H. Hill, of Melville, and was seconded by Harris Turner, M.L.A. for Saskatchewan.

Col. R. H. Webb, member of the working committee, in speaking to the audience, said German capitalists were eager to go ahead with the scheme if the people of Western Canada did not. \$100,000,000 was the estimate they had offered to raise to develop the mining, oil and other resources adjacent to the Hudson Bay Railway. This was done before the war.

Since the war they had approached capitalists in Montreal, Toronto and Winnipeg to form a syndicate to develop them, and the question for Canadians to consider was, would they allow the Germans to do this thing or complete the road themselves.

Col. Webb said the straits and the Nelson River were open 250 days of the year, stating that he had been a visitor to the straits on many occasions and could back up his plain statement.

May Release Dispatches  
London.—Special dispatches from Berlin, reveal rumors that the British Government contemplates immediate release of the interned persons who have not yet been brought home to Britain, but it is not clear whether the rumors of the other Republican leaders would be included.

## Will Establish Patrols Along International Border

Winnipeg.—Sergeants Carter and W. R. Day, of the Provincial Police, are now engaged in making a survey of the points at which patrols will be established during the summer months for the policing of the international border. The American authorities are co-operating with the Canadian officers to prevent liquor traffic, and smuggling, and to make a special view of saving either country from invasion by criminals from the border. Before returning to Winnipeg, Sergeants Carter and Day will make a tour of the border in order to ascertain whether any changes are advisable from the plan followed in 1922.

## Waterway Project

Announcement Made of Appointment of Advisory Committee

Ottawa.—Canada's national advisory committee on the St. Lawrence waterway project, and the Canadian representatives on the joint engineering board, which will consist of three members from the United States and three from Canada, were announced by Premier King.

Hon. George P. Graham, minister of marine and canals, is chairman of the advisory committee. The other members are: Thomas Allan, Ottawa; W. E. Foster, St. John, N.B.; Deshaire Leman, Montreal; Edward D. Martin, Winnipeg; Dr. C. L. MacDonald, Toronto; Major-General W. Stewart, Vancouver; and John Adair-Turgeon, Quebec.

## Anglo-Canadian Shipping Trade

Could Be Wonderfully Developed Says Lieut.-Col. Amery

London.—"If we had the courage and vision to develop it as we should, the Anglo-Canadian shipping trade alone could be made for greater than the whole world shipping of the British Empire at the present time," declared Lieut.-Col. L. S. Amery, former First Lord of the Admiralty, at the annual meeting of the Mercantile Marine Association in Liverpool.

Lieut.-Col. Amery was speaking at a non-political gathering and did not refer to the recent announcement of the Anglo-Canadian shipping trade ought to be accomplished.

## Girls Qualify For "Red" Army Honors

Russian Presents Took Part In War Against Counter-Revolutionaries

Moscow.—Two girls of peasant origin, Miss Bonnie and Miss Survanova, have qualified for high honors in the "Red" Army Military Academy. Miss Bonnie is a former Moscow working girl, and Miss Survanova was a factory hand.

Both girls participated in the war against the counter-revolutionary forces. Miss Bonnie was a former commandant of a detachment of "Red" troops, and each gained distinction for gallantry and resource. They wear the regulation dress of the uniform, including scarlet breeches and high boots.

## Inoculation Of Seed

Alfalfa and Clover Seed Treated With Nitro-Culture

Winnipeg.—Five thousand bottles of nitro-culture for the inoculation of alfalfa and clover seed have been sent out over the prairie provinces from Manitoba Agricultural College during April, is the report of D. B. Shuff, assistant professor of the bacteriology department.

This quantity, Professor Shuff estimates, will inoculate about 2,000,000 bushels of seed which is sufficient to seed approximately 25,000 acres.

No More Credit  
Dawson, Y.T.—It is reported that the Hudson's Bay Company at last has abandoned the system of giving goods to natives on credit. They must now have cash or fur to pay for what they get.

## DEBTS QUESTION MAY END THE RUSSIAN PARLEY

London.—Continued delay by the Anglo-Russian conference here in producing anything like tangible results has produced increased anxiety last the parley. Prime Minister MacDonald stated with the Soviet representatives on April 14, may break down. It is still possible, however, that the next primary session of the conference, which is expected to be held in London, will be the earliest possible moment to salubrious accuracy the progress or lack of progress in which the months' sessions have resulted. Other well informed observers stated that the chances at present seem to be against a successful termination of the negotiations.

As was to have been expected, the question of debt is the rock upon which the conference may split. It is officially stated that Chairman Rakovsky, of the Russian authorities, has not declined to recognize Russia's debt to Great Britain for the three years of the negotiations. He has not progressed far enough for the British delegates to ask for such a pledge.

On the other hand, there is not the slightest intimation from the Soviet representatives that they have any idea of plucking the payment of over the £235,000,000 of private debts much less the enormous totals of the Czarist regime and war debts. These latter the British have indicated a willingness to forget, at least until the other war debts owed Great Britain by continental countries seem likely to be collected.

## C.N.R. Branch Lines

Several Branch Lines in Saskatchewan Are Approved

Ottawa.—The Canadian National Railway Company has again before the railway committee of the House, a bill to authorize the construction of a branch line from Victoria Beach to Pine Falls, Manitoba. Then came a bill for a branch line from Mile 24 on the main line to the Canadian Northern Saskatchewan to Mile 41 near Nipawin, Sask.

Andrew G. Pringle, Attorney General, made some objection to the bill as the proposed line, and the bill as it stood, would cross the line of the proposed route, north-easterly or northerly, for 17 miles from Mile 41.

Differences of opinion arose over the proposed route of a line from Hudsonville to Pitt Lake, Sask. N. H. McFarlane (Hagle Creek), suggested that the line should run south from Hingham to tap the Wood Mountain area. Hon. W. R. Motherwell, minister of agriculture, thought the route proposed in the bill preferable. The bill was carried with an amendment providing for alternative route from Hudsonville or Hagle Creek to Hingham. In a southerly then westerly direction, "as the engineers may decide."

Discussion arose on the Saskatchewan branch line from Humboldt to Mauer. Objection to the route of this line was raised by A. J. Lee of Swift Current. An alternative route was provided via a point west of Mauer and the bill passed.

## Many Competing For Helicopter Prize

British Air Ministry Has Set Severe Test For Machine

London.—Entries have just closed the competition for the British air ministry's prize of £25,000 for a helicopter fulfilling the conditions prescribed when the test was announced May 1, 1923, by the Daily Telegraph. There are between 15 and 20 entrants, including some of the greatest authorities upon the theory of this form of flight. It may very easily mean for the ministry to fix the date of the competition. It is required that to win the prize a machine shall accomplish a straight up and down flight attaining an altitude of 2,000 feet, a hovering flight of half an hour, a circular flight of 20 miles and 60 miles an hour, a descent into a small area from 200 feet with the engines stopped.

## Food And Disease

Plenty of Fruit and Vegetables Keep People Healthy

Monks in Ireland enjoy a remarkably healthy life, according to recent investigations made by the British army. It is because they eat no meat in the monasteries, but consume a great deal of fresh vegetables and fruit?

Dr. J. Macdonald, of the British army, has been making an investigation at the Carthusian Monastery at Comber, near Belfast, Ireland. He states that so far as has been able to ascertain the monks there appeared to be extraordinarily healthy. He pointed out that no meat was eaten in the monastery, but the monks eat a great deal of fruit and vegetables. Green beans are among the most important items of food. They like the beans on the continent they also make large dietary use of dandelion and chrysanthemum.

"There is no doubt," said Dr. Macdonald, "that middle-aged people should eat plenty of fruit and vegetables in their diet. Most of the monks at Comber are middle-aged, but there are some old ones. I saw one who is nearly a hundred years old employed as a cutting assistant. The monks said that monks are not so free from disease, and that there is a great deal of consumption in the monastery, particularly in the very poor ones. The procurator of the monastery states that the monks have been a detailed study on the dietary habits of the monks with a view to applying their traditional principles to the treatment of cancer. The opinion is that by gaining ground among medical authorities that the kind of food we eat has a great influence on our health and our freedom from or susceptibility to disease.

Dr. Adam Wright, chairman of the Provincial Board of Health in Toronto, has given this matter of diet as a preventive of cancer some thought. He holds the opinion and it is gaining ground among medical authorities that the kind of food we eat has a great influence on our health and our freedom from or susceptibility to disease.

## Christians From Fiji Are Visiting England

Sent to Represent Their Native Isle at Wesleyan Exhibition

Hereditary chiefs of two of the chief Fiji tribes, Ratu Jona Iloilo and Ratu Jona Iloilo, have reached Vancouver recently aboard the R.M.S. Makara from Suva. These two chiefs are the only two natives to be a native member of the Legislative Council of Fiji and head of the province of Cakobato, the latter a native chief and governor of the province of Cakobato, the latter a native chief and governor of the province of Cakobato, the latter a native chief and governor of the province of Cakobato.

Both the chiefs are natives, powerful, well built men, their white black faces seem to smile perpetually. Ratu Iloilo is about 50 years of age, a native of the province of Cakobato, the latter a native of the province of Cakobato, the latter a native of the province of Cakobato, the latter a native of the province of Cakobato.

Alberta Anti-Weed Council. An Advisory Weed Council, to assist the Alberta Department of Agriculture in its anti-weed campaign, has been organized and will begin work at once. Its members are F. H. Baird, field of the Dominion Experimental Farm at Lethbridge, and three of the R.E.A. members of the legislature, W. H. Belding, Macdonald, T. G. Cook, Pinder Creek, and P. D. Egan, Alexandria.

Big Grain Movement. The development of wheat raising in Western Canada is indicated by the fact that in 1929 the Canadian Pacific Railway moved to the head of the lake 50,000,000 bushels, while last year the same railway moved 150,000,000 bushels, and this is an indication of the large tonnage moved by the Canadian National Railways.

The moon is becoming capable of sending 112 miles an hour. On account of friction and danger, no moon is not often exceeded.

## Weed Makes Good Fuel

Straw Growth in Nile River Used on Steamers

For centuries it has been remarked and returning travellers relate today that a strange growth of thick weeds and algae near the surface of the waters of the Nile, above Khartoum, are responsible for the impassability of the river at that point, writes the Washington Star.

French scientists, after a painstaking investigation of this strange, weedy, grassy, sedge-like mass called *salvinia*, constructed first a coal, and they set about to prove their hypothesis.

Because coal is almost completely exhausted and practically prohibited for fuel use at the necessarily high prices, needs of fuel in the Sudan has kept the industrial development of the country at a standstill. There are 5,000 square miles of this Nile weed.

It grows about three feet by the surface of the river and grows in a mass, not in a clump, from the bed of the Nile. Composed of roots, stems, flowers, grasses, paper-like and the like, it resembles at first sight in less than three weeks, out the mass down, the like it into large, make rafts of the material and float them in the river to Khartoum. This is taken to an industrial plant and transformed into dry, compact packages.

In tests made by the French, it was found that the weed, when used as fuel, gives off a great deal of heat, and is found to be a good fuel.

## Ten Tests of a Town

The Needful Qualifications For a Desirable Town or Village

What are the qualifications of a desirable town? The chairman of the department of Journalism of the University of Kansas has recently published the following ten questions, as those most frequently asked by people looking over a community with the idea of possibly settling in it.

1. Attractiveness. Is it pretty and well kept?
2. Healthfulness. Is it well maintained and free from disease?
3. Education. What are the facilities?
4. People. Are the residents good citizens?
5. Economy. Is it really reached from other towns?
6. Recreation. What is provided?
7. Industry. Are there good opportunities for investment?
8. Employment. Are there prospects for employment?
9. Progressiveness. Is it going ahead?
10. A town cannot control its climate or its natural scenery or historic associations, according to his questionnaire, but "in all other respects, it does not measure up to the standard that will be applied to it by intelligent townsmen, get her and 'Hold Make It Measure Up'." The first job of a good town is to make it so that its community is right.

The questions which prospective or potential residents of a city, town or village will not be asked in the above list. They are more likely to be asked in the future, but if a community measures up well on all ten of the questions, it will not fail far below the head of its class these days.

Amblin communities in this province might do worse than sit down with these "ten tests of a town" and subject themselves to a stiff self-examination—Regina Leader.

## Works Both Ways

The square was walking through the street, wearing a hat, wearing a very shabby coat, when he met a friend.

"Hello you are ashamed to be seen in such a shabby coat," said the friend.

"Certainly not," replied the friend. "Everybody knows me here."

A week later the square was in Birmingham, still wearing the old hat and coat. He was again met by a friend, who again commented upon his untidy appearance.

"What does it matter?" was the reply. "Nobody knows me here."—London Daily Mail.

## To Build New Sanatorium

Provisional work has commenced on the construction of the \$480,000 sanatorium in Saskatoon. Full time construction equipment is already on the ground and all the building material with the exception of the structural steel. It is anticipated that employment will be provided for upward of 100 men immediately excavation work is completed and the running of concrete commenced.

What the people of Europe need to do to light somewhere and stay put.

## Largest Handmade Mats

Woven by Hindu in Sialkot for British Empire Exhibition

Sir Joseph Cook, High Commissioner for Australia, located at St. Dunstan's, what are probably the largest handmade mats ever made entirely by hand. They were part of the covering for the floor of the Australian Pavilion at the British Empire Exhibition. Measuring 69 feet by 8 feet 6 inches, the largest of these mats covered an area of 601 square feet, and woven into it is black fiber the word "Australia" in letters 2 feet 6 inches high. Four of the mats cover a total area of 240 feet. The mats have been made entirely by blind soldiers and sailors trained at St. Dunstan's who have been at work upon them in their own homes for the past three months, the sections, which number forty, having been assembled at the headquarters in Regent's Park. St. Dunstan's secured the contract in open competition.

## Resistance to Heat

Fat Men Can Stand Heat Better Than Lean Ones

Fat men stand the heat better than lean ones, the U.S. bureau of mines has established through experiments in a specially constructed chamber at Pittsburgh. The fat men, the bureau found, lost more weight when subjected to temperatures both superheated, but they were less exhausted when they were released. Pulse rate rather than rise in body temperature. It was discovered, apparently determining the extent of discomfort in high temperature. Subjects became very uncomfortable when the pulses reached 140, and unbearable symptoms appeared at 160. The highest pulse rate recorded was 144.

The experiments were designed to afford a study of conditions as they might affect miners.

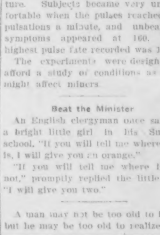

## Beat the Minister

An English clergyman once said to a bright little girl in his Sunday school, "If you will tell me where I live, I will give you a crown."

"If you will tell me where I live," she replied, "I will give you two."

A man who is not too old to read, but he may be too old to realize it.

## To Establish Forest Wealth

Taking Stock of Extent of Timber in Quebec

In a further attempt to establish the wealth of the timber forests of the province of Quebec not yet covered, the inventory of the section in the upper Chaudiere and Lake St. John districts, as well as the Northern shore will be resumed early in May by engineers of the Provincial Department of Lands and Forests.

It will take years to complete this work, but already 50,000 square miles in the sections above mentioned have been inventoried and this section's plans provide for the inventory of some 50,000 additional square miles. Through the use of hydroplanes, reconnoitering work which would take five years to be performed otherwise is done in two hundred hours of flying, and the cost, instead of reaching thousands of thousands is reduced to a minimum.

Three hydroplanes are expected to be operated this year by private companies under contract to the Provincial Government.

Julius Casar Used Elevator. According to the statements of the manager of a large elevator company who has made a careful study of the subject of elevators and lifts, the famous Roman conqueror, Julius Casar, was the first to conceive the idea of an elevator and had the first "lift" constructed.

He says that the Roman conqueror built one on board building materials. After tracing the evolution of the elevator down to the present time, he indicates how marauders a single operator could run as many as 20 elevators, which may be stopped simultaneously at different floors.

And yet he got into trouble over it. Ample evidence. "Good morning, Billie boy, why up so early?" "Billie, I don't know."

Ample. "Why don't you know?" "Ample. I don't know."

Only one woman in 100 in India can read; only one woman in 1,000 China; even women know their letters.

## Asks League's Decision

German Lady's Claim to French Property is Denied

"The man without a country," or in this case a woman, actually has come before the League of Nations. A woman, whose property in France was confiscated during the war, appeared to the World Court at The Hague, stating that France labels her as German, but that Germany refuses to recognize her as a national. The World Court passed the problem of the woman's recourse to justice up to the League.

Conditions arising from the war probably have placed many persons in this same position, so that they are deterred from all existing legal tribunals.

The legal lights of the league admit there is involved in such cases a dual legal system. The solution appears to be the elaboration of an international convention by which states surrendering sovereign rights of deciding for themselves the conditions under which their nationality is automatically, or voluntarily, acquired or lost. The question raised by the German woman does not lie within the competency of the league covenant, and it seems plain, say the legal experts, that the league can act only through the initiative of a state.

## A Message to the Moon

Test Rocket Will Be Sent Up Late This Week

Professor Robert H. Goddard, of Clark University, who some time ago announced that he had designed a rocket with which he hoped to send a message to the moon, will send a test rocket into the air late this summer. It is expected.

The contrivance, which will be about five feet high, and loaded with a series of explosive charges, is expected to ascend about ten miles above the earth.

"The rocket will do on a small scale what one of the same type but of large size will do on a large scale," says Goddard. "Upon the success of the experiment, perhaps in a year or so, my effort to reach the lunar satellite."

If things fail to come your way go after them.

## With The Boy Scouts

An, Bth Vancouver Scout Law

The following story from the Scout News paper of the Vancouver Province offers a good example of what boys might put into and get out of a Scout Law day.

At the last meeting the Curlew Patrol made their first attempt at a Scout Law day.

It succeeded very well. The Third Law—Honesty—was their subject.

A student scout appears on the scene—Scout Hawk—drilling along deep in thought. He is accented by a rough-looking character—Scout Peaches—

and asked for the price of a meal.

While fumbling in his pockets the rough scoundrel his victim and rapidly goes through his pockets, taking all of value, including someone's pocketbook.

At this point the rough scoundrel appears on the scene looking around for his cap, which he fears may be discovered and lead to the discovery of his identity. The Scouts ask if they can be of any assistance, and after a moment's hesitation the rough states that he is looking for his cap.

At this point the rough states that he is looking for his cap. The Scouts ask if they can be of any assistance, and after a moment's hesitation the rough states that he is looking for his cap.

At this point the rough states that he is looking for his cap. The Scouts ask if they can be of any assistance, and after a moment's hesitation the rough states that he is looking for his cap.

At this point the rough states that he is looking for his cap. The Scouts ask if they can be of any assistance, and after a moment's hesitation the rough states that he is looking for his cap.

# Pre-st Air Ice Is Expected To Revolutionize The Entire Science Of Refrigeration

Pre-st air ice—the one of the wonderful discoveries of the age—is about to revolutionize the entire science of refrigeration. And what a tremendous force in our national life refrigeration has become. When this continent was first peopled, the settlements were largely scattered along the more important waterways and those unpopulated areas that turned an annual harvest of natural ice adequate to the limited demands of the time. But as the country has developed, as regions upon regions have opened up and population, as the problem of food distribution have become more and more complicated, and as the uses of ice and refrigeration have become infinitely more numerous, the waterways and the forests of the country have become for the most part too isolated for their ice to be used for human consumption, and we have had to resort increasingly to the artificial product, so that last year our total consumption for the United States and Canada, of seventy million tons, more than half of the total was artificially produced. And to produce this forty million tons, the combined activities of six commercial areas of varying capacity were necessary.

First successfully demonstrated more than a century ago, artificial refrigeration did not become a practical one until approximately forty years ago, while mechanical refrigeration is about thirty years old. It is true, however, the production of pre-st air ice, however, the production of pre-st air ice has become a universal, especially on this continent where it is an indispensable necessity of the national life.

Pre-st air ice, which, as we have stated, is destined to revolutionize the refrigerating industry, is the discovery of two eminent scientists, Walter S. Stephenson and Thomas H. Slater, is the culmination of many years of these two men, many years of patient and diligent research, during which time a veritable fortune has been expended. But at last, pre-st air ice, which has been demonstrated conclusively that this new form of refrigeration is a real commercial success.

Pre-st air ice is the ultimate result of a myriad of experiments that have been made by its inventors and its scientific basis is in the realm of power. Messrs. Stephenson and Slater found that carbon dioxide, thoroughly prepared and properly treated, when compressed to liquid form, would accomplish such work as jacking up automobiles and many other uses, and from this knowledge they evolved an industry—their Air Corporation—which is now one of the fastest growing developments in the land.

In their experiments, the inventors experimented with such apparatus as the freezing of their apparatus that they determined to work intensively in this new suggested field, and finally succeeded in developing a new method of freezing the gas into snow and producing it into a substance closely resembling ice, hence the name, pre-st air ice. This new ice has a critical temperature of 114 degrees below zero Fahrenheit, as compared with a critical temperature of 32 degrees Fahrenheit for practically all natural and manufactured ice.

Pre-st air ice is absolutely moistureless, reverting to gas upon vaporization. It is the only absolutely sterile atmosphere yet discovered to science, and as no bacteria or other germ life can exist under its influence it constitutes beyond question the most efficient preservative of foodstuffs yet evolved. In 1922, when the first artificial, indeed, have been desired, after elaborate experimentation, that this ice is competent to destroy even the most virulent of bacteria, and its unquestioned powers for the correction of infection.

One of the advantages of pre-st air refrigeration lies in the fact that its employment it will be possible to use and maintain any desired temperature from 114 degrees below zero Fahrenheit to 74 degrees above, and this is wholly irrespective of outside temperature. Thus, it will be possible to create a cabinet of ice, or to place it on an interior plant with a predetermined temperature in absolute assurance that there will be no deviation of temperature throughout the day.

One of the chief fields for this revolutionary discovery in refrigeration will be in the sphere of transportation. Last year the railroads of the United States and Canada consumed nearly fifteen million tons of ice in refrigeration, while this year, when the cost of four dollars a ton at a plant would mean the primary refrigerating capacity of at least fifty million dollars annually. So serious, indeed, as this problem.

Pre-st air ice, however, the production of pre-st air ice has become a universal, especially on this continent where it is an indispensable necessity of the national life. Pre-st air ice, which, as we have stated, is destined to revolutionize the refrigerating industry, is the discovery of two eminent scientists, Walter S. Stephenson and Thomas H. ## Exporting Canadian Honey

Ready Sale Is Found In Great Britain and European Points

A. G. Halstead, manager of the Ontario Cooperative Honey Producers' Association, states that Ontario honey is beginning to move readily into Great Britain and is being sold at profitable prices. In fact, the export market at the present time is ahead of the local outlet for as prices for the products are concerned. Following up the sale of Ontario honey, the winning of a championship in honey at one of the leading exhibitions in the world, the Ontario Cooperative Honey Producers' Association have developed an extensive market for their wares across the Atlantic.

"Since last December," said Mr. Halstead, "we have shipped over three-quarters of a million pounds of Great Britain, mostly in the 50-pound package. We have made five shipments, totalling 450,000 pounds, to Denmark, 450,000 to the Netherlands, and have orders from Austria, Portugal and Germany." He said that the 50-pound package was used almost exclusively for export, and that the reason for this was that the material was purchased for manufacturing purposes. "In Britain," he said, "the material is sold for direct human consumption."

Production of honey in Ontario is now estimated at 1,500,000 pounds and 2,500,000 for the Dominion. Moreover, the output, especially in the present production, is increasing rapidly. Manitoba, for instance, had an output of a little over a million pounds in 1920; last year this had risen to over three million.

## Percentage Of Crops On Hand

15 Per Cent. of Last Year's Wheat Crop In Farmers' Hands at End Of March

At the end of March, according to official figures, 15 per cent. of last year's wheat crop was still in farmers' hands. Last year at the same time the amount in farmers' hands of the 1922 crop was 14 per cent. In the wheat crop, 15 per cent. in farmers' hands on March 31, was 70,750,000 bushels, as against 22 per cent. on hand in 1921, when it was 70,750,000 bushels. In 1922, at the same time, 4,471,000 bushels remained of the yield in 1922. In 1921, at the same time, 4,471,000 bushels remained of the yield in 1921. In 1922, at the same time, 4,471,000 bushels remained of the yield in 1921. In 1922, at the same time, 4,471,000 bushels remained of the yield in 1921.

At the end of March, reports received at Ottawa indicated that on the average the winter in Canada had been the best and that the weather was in good condition, that winter was plentiful, and that heavy horses, good milch cows and sheep were in demand.

## Pulp and Paper Exports

Returns Show How Pulp Industry Is Growing

Exports of pulp and paper from Canada for the month of March, 1923, according to the report of the Canadian Pulp and Paper Association, were valued at \$1,120,223, as against \$1,252,021 for the corresponding month of 1922, and the highest since October, 1920, when prices were considerably higher than they are at present. The above sum is divided into \$160,573 for newsprint, and \$1,059,650 for other pulp.

For the first quarter of the year value of exports of pulp and paper from Canada was \$3,234,187 for the first quarter of 1923. The increase was solely in paper, there being less pulp exported than in 1922.

Exports of pulpwood in March were valued at \$1,925,418, a considerable advance over the previous month. For the first quarter of 1923, the total value of pulpwood exports was \$5,842,100, compared with \$5,494,528 in the same quarter of 1922.

## Chinese Cool For Canada

In Cheng, the new Chinese consul-general, who arrived at Ottawa recently, announces that he is intending to take up the question of the establishment of a new colony of Chinese in his country, he says, to supply Canada for the next hundred years. Cheng is an Oxford University graduate.

## Alberta Plaines Win

At the Ontario Middle West competition held recently held in Master Hill, Eugene Murphy, of Red Deer, Alberta, won the gold medal in the solo contest for plowmen. The contest was open to all Canada. The sole place was Lady's arrangement of Paganini's "La Campanella."

## Things That Complete A Costume

Bracelets and Bangles are more popular than ever. This string of art nouveau bracelets, imported from China, with a hand bracelet to match, are attractive lines for morning or afternoon wear.

## Making Boards of Straw

Possibilities of Utilizing Straw from Farm and Pasture

Samples of straw-board made from Alberta straw have been received by Premier Greenblatt from the Montreal Laboratory of the Dominion Forestry Branch. The Premier has had the experiments conducted in order to utilize the possibilities of straw in the construction of building materials. It is found that the material produced is very similar to the wallboard, now so much used for interior house construction. It will set under heat and fire insulation, hence cannot be used for exterior purposes where it would be exposed to the weather. While the manufacture of this material is quite feasible it is likely to be some time before it will be placed on the market as a commercial proposition.

## Patrolling Forest Areas

Hydroplanes Will Be Used In North-Western Ontario This Season

Seven hydroplanes will be engaged in patrolling the forests of Northwestern Ontario from May 15th to the end of the season, and considerable reduction in the ground work of fire fighting will be made as a result of the new programme decided upon by the Ontario Department of Lands and Forests. The hydroplanes will be commanded by expert pilots and will be used extensively in patrolling and reporting the presence of bush fires.

## Many Come West

85 Per Cent. of Immigrants Arriving at Atlantic Seaboard go to Western Points

In his address to the Border Cities Chamber of Commerce, Mr. E. W. Kelly, president of the Canadian Pacific Railway, stated that the immigrants who have entered Canada by Canadian Pacific ships since the war have been 85 per cent. coming from the west, and that 20 per cent were destined for farms. He believed that Canadian soil, without the aid of a minimum of 500,000 and a maximum of 600,000 new people per year.

## Scheme To Link European Canals

A great scheme which there would be considerable sums of money from Nantex, the French port, to Switzerland, and linking up with the great European canal, is being considered. If it is carried out, there will be continuous water travel from the Atlantic Ocean to the Black Sea, across France, Italy, and the Balkans. The promoter of this plan is the Comte de Bresson, who has brought it before the French Chamber.

## Manitoba Beekeepers

A proposition to be worked out by the Beekeepers' Association of Manitoba whereby its members will ship honey to Winnipeg for clearing and then sell under one label and one price. The scheme would be run on a co-operative plan.

# The Post-War Wealth Of Leading Nations Is Shown To Be Appreciably Lower

## World-Wide Butter Prices

No Other Article, Except Precious Metal, So Uniform in Price

Butter, the gold, has a world-wide standard of value. It is pointed out in a review of the 1922 market by the California Dairy Council. The review says: "Milk may be produced, manufactured into butter and sold to a home within a radius of ten miles, but the price of that butter is determined by conditions in the four corners of the world."

"No other article of commerce, except the precious metal, is so uniform the world around as the product of the dairy, of which butter is the foundation. Wherever it comes from New Zealand or Nova Scotia, Denmark, Wisconsin or California, it is simply better when it reaches the markets of New York, Chicago and San Francisco, and the prices in all parts of the world are affected. Freight rate differentials are practically the same."

During 1922 average prices of dairy products throughout the country increased—butter 17 per cent., cheese 12 per cent., condensed milk 20 per cent., and milk powder 12 per cent.

The dairy cattle market has increased in almost the same proportion everywhere, from an average of 45 cents a pound to an average of 65 cents a pound, but in California the increase was slightly less, being from 52 to 67 cents.

Consumption of dairy products in this country increases faster than the supply, according to the review.

## Prevent Spread of Cattle Epidemic

Vancouver Board of Trade Takes Steps to Curb Disease in British Columbia

Preliminary steps were taken by the Vancouver Board of Trade to arrange for a conference of medical health officers of the provincial government, cattle corporations, livestock authorities and others interested in combating the spread of the California cattle epidemic outbreak.

The idea is to have a conference and formulate definite steps for the prevention of the epidemic of British Columbia from any form of contagious cattle disease. It is pointed out that the epidemic of California cattle has been exposed to the west and north of the province.

## Bright Future For The West

D. B. Hanna Predicts Renewed Prosperity For Prairie Provinces

D. B. Hanna, of Toronto, is still an ever a firm believer in the future of the west. Interviewed by the Manitoba Free Press, Hanna said that farmers generally were once more seeing things from a right perspective and he considered that this made the future of the great west very bright.

"There was a fall," said Mr. Hanna, "when the farmers had got slightly out of line with regard to their perspective and were relinquishing large areas, seemingly under the idea that wheat would always remain at a 25-cent level. Now, however, they are getting down to being real farmers, paying strict attention to the raising of cattle and hogs, and it is from this change that I predict renewed prosperity for the west."

## Saskatchewan Creamery Products

An increase of over 50,000 pounds in creamery productions for the first three months of the year as compared with the corresponding period reported by P. E. Reed, Dairy Commissioner for Saskatchewan, in January, February and March, 1923. The total value of creamery products was increased compared with 1,271,000 for the first three months of 1922. The value of the first three months of 1923 was 1,521,000, an increase of over 25 per cent for the three months of this year.

## British Buyers Baffled

British buyers were baffled with the shipments of Canadian grain recorded last year, according to Sidney R. Smith, head of the Smith, Murphy & Co. firm, in a statement made to the Royal Grain Commission at Winnipeg. Mr. Smith said his company had shipped 45,000,000 bushels of wheat to the United Kingdom last year, and a single complaint had been registered.

Absolutely new—the point at which bodies on earth are entirely devoid of life—exists at 158.1 below the Fahrenheit scale.

The aggregate gross wealth of the 29 oldest nations, actively engaged in war, was, according to an estimate just completed by the research department of the Bankers' Trust Company of New York, estimated at \$225,000,000,000. The wealth of these nations today is estimated to be about \$150,000,000,000.

The pre-war wealth of the British Empire, that is of Great Britain, the Dominions, India and the Crown Colonies, was approximately \$150,000,000,000, while today the wealth of the same group of nations is estimated by the Bankers' Trust Company to be about \$110,000,000,000.

The wealth of France before the war is placed at just under \$60,000,000,000, and is estimated to be approximately the same today. The pre-war wealth of the United States is placed at \$200,000,000,000 and the wealth today at \$225,000,000,000, with a pre-war wealth of Germany is estimated to have been upwards of \$50,000,000,000 and today to be about \$55,000,000,000. These figures are of the gold pre-war basis of values, having been adjusted for inflation.

The pre-war wealth of Great Britain today is placed at \$130,000,000,000 and of the different nations composing the British Empire at \$110,000,000,000. The pre-war wealth of the United States is placed at \$200,000,000,000 and the wealth today at \$225,000,000,000, with a pre-war wealth of Germany is estimated to have been upwards of \$50,000,000,000 and today to be about \$55,000,000,000. ## Record Handling of Foes

A record low handling and handling of foes was established by the Canadian National Railways when thirteen cars of foes were unloaded off trains at Prince Rupert, B. C., on April 22, and arrived in Winnipeg at 9 a.m. April 28. The foes were consigned to Winnipeg, British and Chicago, the time occupied in the run from Prince Rupert to Duluth being 18 hours and from the seaboard in Chicago 12 hours.

## Escaped From Jury Duty

A new reason for being exempt from jury duty was discovered by a Canadian court. Eleven jurors had been selected and sworn in. The twelfth juror, a man named John A. Gibson, was called to the court. The juror was called to the court. The juror was called to the court.

## More Butter In Manitoba

About 15 per cent more butter was produced in Manitoba in 1922 than in the preceding year, according to the estimate of the Canadian Dairy Commission. The quality, he states, is also distinctly ahead of last year's, cream grading is having its effect.

Another good way to save is to make more butter than you can conveniently export.

## Mirror and the District

J. F. Flewelling is spending this week in Calgary.

Tom Wing was a Calgary visitor over the weekend.

R. Allan returned last week from an extended visit in Scotland.

W. C. McCormack and Wm. Stump returned to Edmonton last week.

Mrs. Henry Carr returned on Tuesday from a week's visit in Edmonton.

Mrs. J. Annesley and daughter Florence, were Calgary visitors for several days last week.

Miss McLean, accompanied by her niece, Margaret McLean, are visiting in Calgary this week.

We regret that owing to lack of space several interesting items are held over until next week.

Mrs. G. K. TILLEY announces a big reduction in all lines of millinery. Now is the time to get a real bargain.

G. J. Estell and Rose Estell returned from a visit to Edmonton on Tuesday. The latter is now operating a new Maxwell.

The Mirror high school girls' team suffered defeat at the hands of the Alx girls on the local grounds last Saturday evening, score 16 to 9.

M. Ebert Howe, Registered Optometrist and OPTICIAN, will make his next regular visit to Mirror, at the Imperial Hotel, on Wed. June 19, 13.

WHY pay rent? Buy your own home. Call and see Mrs. Tilly as to some excellent opportunities. Terms can be arranged in most cases to suit the purchaser.

D. E. Bull received the sad news by wire this (Wednesday) morning that his mother had died suddenly in Calgary, and he left on the afternoon train for the city. The late Mrs. Bull was a visitor in Mirror about a month ago.

How about your insurance? Is your home and furniture fully protected in case of fire? If not, call and see Mrs. Tilly and get the best of service in placing your insurance.

Robt. Hewitt, of Winnipeg, grand lodge deputy of the Brotherhood of Railway Carmen of America, was in Mirror on Monday. A meeting of all the shop crafts in the local yards of the Canadian National railways was held Monday evening.

ANNOUNCE THIRD  
ANNUAL TOUR  
TO THE COAST

Special Train from Winnipeg. Stops  
Made at Various Points of Interest

## PERSONALLY CONDUCTED

This tour, which will be interesting to the holiday maker and of great educational value to the student and the teacher, offers an unusual opportunity for seeing under the most favorable conditions, the Canadian Rockies, including Jasper National Park, and the Pacific Coast.

The special train, operated in connection with this tour and consisting of modern sleeping car equipment, dining car and radio observation car, will leave Winnipeg, July 2nd. After stopping at various points of interest, the train will arrive at Prince Rupert on July 7th. At this latter point, the party will embark on one of the palatial steamships of the Canadian National Pacific Coast services for a cruise of 655 miles through the famous "Inside Passage" to Vancouver. While the tour terminates at Vancouver, those who desire to make a trip to Victoria, may have their tickets read "Victoria" as their destination without any additional cost.

The local agent of the Canadian National Railways will be pleased to give you full particulars of this tour, including the cost, choice of routes, returning, etc.

## Baseball May 24th

The Central Alberta baseball league will open on May 24th, with Mirror opposing Lacombe on the latter's grounds. The game will commence at 6 p.m., and it is expected that a big crowd of supporters will accompany the team. Schedule of games will appear next week.

## M.D. Discuss Roads-Bridges

(Continued from page one)  
for a settlement with Mr. Toss and report back to the council. Messrs. McDonald and Cassel were appointed representatives from the council for Tees cemetery.

Mr. McDonald reported in regard to prairie fire, section 9, 10-41-23, stating that the matter had been brought to the attention of the A. F. P., and that in the event of action being taken towards the prosecution of the guilty parties, it would be necessary for the Inspector (Mr. Crossley) to retain counsel to assist him in the prosecution and it was agreed on the motion of Mr. Olsen, to allow Mr. Crossley to secure the necessary assistance, the expense, approximately \$10.00, to be borne by the council.

E. Ainsworth, engineer and district inspector of Red Deer, attended the meeting in order to discuss road and bridge work. The council, in connection with the government grant, stated that the amount of the grant this year for Lanerton M. D. would be \$227.00 and a very interesting talk gave some of his views in regard to the best way in which to accomplish the possible permanency of good roads in the municipality.

We deprecated the present day idea of councils leaving the impression with the ratepayers that in working out their taxes and strongly urged every councilman to do everything in his power to stamp out this impression, and also stated that in a great many municipalities the plan was to have the tax-payers work on the road, on account of the fact that his taxes were in arrears. He urged the idea of a permanent road force, experienced in road work and in road machinery, one who was capable of taking entire supervision of the road work, hiring the necessary help and the recommending of the machinery necessary for the making of good roads. He closed his remarks by inviting every councilman to attend the road demonstration work which the provincial government is putting on at Lacombe, June 16th and 17th.

On motion of Mr. Tallman, a number of accounts were passed for payment.

The meeting adjourned at 7:30 p.m.  
D. M. JEWELL, Reeve.  
R. G. LOWE, Sec.-Treasurer.
